DreamVision launches Dreamy *Geek II*, the smartest portable LED projector on the market

*This LED Projector combines amazing Performance and unique features*

Paris, France – May 20<sup>th</sup>, 2015 — **Dreamvision**, a cutting-edge brand of residential video products for the home theatre specialist, famous for its high-end Siglos Series and its awarded B.E.S.T. Passive 3D solutions, **Dreamvision** extends the Dreamy Series with the new **Dreamy *Geek II***.

The Dreamy *Geek II* is the proud successor of the Dreamy Series. Its specifications have been drastically boosted compared to the original Dreamy *Geek I*: bringing to this high contrast DLP projector both high quality 3D and H.265/HEVC video playback, Bluetooth 4.0 connection, Dual frequency 2.4G/5G WiFi, brighter LEDs within a sleeker design.

The new Dreamvision Dreamy *Geek II* is a powerful 1280x800 DLP projector powered by the latest 1200 ANSI Lumens LED light source, whose exceptional longevity ensures up to 30,000 hours of video-projection.

**LED**

30,000 hrs

Thanks to its numerous inputs (including two HDMI inputs), the Dreamvision Dreamy *Geek II* projector supports Full-HD movies with stereo sound and can natively read multimedia files from USB devices or Micro SD cards. Thanks to its bright light output and the two 2W loudspeakers, the Dreamy *Geek II* turns any living room into a thrilling theatre.

Weighing only 760g (1.67 lbs), the Dreamvision Dreamy *Geek II* is a portable and versatile projector. You can easily take it to a customer's premises for your products presentations or to a friend's house for a football match or to your holiday place for daily movie watching. There are a micro-SD card slot and two USB inputs that can accommodate USB keys and hard disks.

Photo: Inputs: two HDMI with audio, a VGA, an USB and a Micro-SD card slot.

The Dreamvision Dreamy *Geek II* is a smart projector that can read the most popular audio and video files thanks to its internal Media-Player and in the highest quality available. For instance, it supports mkv videos with multiple audio and / or multiple subtitles. You can bring anywhere a copy of all your favorite discs on a single disk.

Photo: Multimedia contents may be stored and read on Micro SD cards or USB devices.

The Dreamy *Geek II* can read up to 2K video files using the latest high efficiency H.265 video encoding that makes it future proof.

May you be a casual game player or a hardcore player, the Dreamy *Geek II* is made for you. Of course you can connect your PC or your video game console directly to the Dreamy, as you would with a TV or a monitor display. Thanks to its numerous inputs (2x HDMI, 1x RCA), the Dreamvision Dreamy *Geek II* LED projector can accommodate most PC graphic cards and old/recent consoles.

Powered by an Android 4.4 system (English language only), the Dreamy *Geek II* may support most of the thousands of available Apps on the Google Play market. Enjoy unlimited hours of games and interactive media contents.

Dreamy *Geek II*  
User Interface

The Dreamy *Geek II* has a short throw 1.20:1 lens and a 50% offset. The benefit of having a short throw lens is that it minimizes the distance from the screen to the screen so much so, that the user can seriously contemplate the idea of putting the projector above, or inside, or below a coffee table, or wherever near to the screen/wall. As on the example here after:

Photo: A Dreamy projector on a coffee table projecting on the wall

The Dreamy *Geek II* is fully compatible with 3D contents. Thanks to its two HDMI inputs, you can watch any 3D Blu-ray disc in 1080p or play video games from game consoles in 720p. The Dreamy *Geek II* can also project in 3D older 3D formats such as Side-by-Side or Top-and-Bottom used on the TV or with Youtube 3D videos. Just don't forget to put your Dreamvision DLP-Link glasses on.

The new Dreamy *Geek II* features a Bluetooth connection rev. 4.0 that includes High Speed and Low Energy protocols. That makes the *Geek II* connectable to high quality sound bar.

Apart from Bluetooth, the Dreamy *Geek II* has also a rich connectivity for audio playing:

- 2x Loudspeakers 2x2W with surround effect
- 1x S/PDIF Optical (PCM or RAW output)
- 1x RCA Audio (with supplier adapter)
- 1x Headphone jack 3.5mm

Smart projector by nature, the Dreamy *Geek II* can be enriched with many of the functional applications available on the Google Play market. There is no limit to the possible functions for a projector as smart as the Dreamy *Geek II*.

Enjoy Google Play apps  
on larger screens

- Play the most famous video games on Google Play
- Upgrade with Airplay functionality
- Share your scores with Facebook
- Watch movies on multimedia players
- Browse the web with the integrated browser
- Download or stream YouTube videos
- Transform walls into interactive whiteboards

**Conclusion:**

With the Dreamy *Geek II*, Dreamvision sets higher the standard of the high quality DLP LED projectors once again. Thanks to the LED lamp, the rich connectivity and all the multimedia possibilities, the users will enjoy thousands hours of game, video and interactive media content with the Dreamy *Geek II*.

- The 3D capacity (FP, SbS and T&B) and DLP-Link compatibility.
- The transportability: the Dreamy *Cinema* weighs only 760g.
- The Android Applications.

**About Dreamvision**

Located in Paris and led by industry pioneer Jean Claude YOUNES, this visionary French firm had its beginnings way back in 1982, being the very first company to sell video projectors on the French Market.

Fourteen years later, Jean Claude Younes decided to create his own brand of cutting-edge video products and he called it Dreamvision. Since 1996, in the shadow of the world-famous Montmartre hill, Dreamvision has been developing and refining the latest advancements in digital display technology to provide state-of-the-art video and audio products for Home Cinema and projection systems in general.

Today, Dreamvision is a highly respected, global brand with a worldwide distribution network.
